

Harshal Chaudhari

Python Full Stack Developer

Akurdi, Pune, Maharashtra | hchaudhari752@gmail.com | +91-8999006052 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Python Full Stack Developer with hands-on experience building web applications using React.js on the frontend and Python (FastAPI) on the backend, backed by MySQL and PostgreSQL. Comfortable across the full SDLC — REST API design, database querying, data processing with Pandas/NumPy, and Docker-based deployment — with a track record of shipping full-stack features on production platforms during a recent internship and academic projects.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)

Backend: FastAPI, REST API Design, JWT Authentication, Role-Based Access Control (RBAC)

Databases: MySQL, PostgreSQL, MongoDB

Data & Libraries: Pandas, NumPy, Data Cleaning, Data Validation, Exploratory Data Analysis (EDA)

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Jupyter Notebook

Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Client-Server Architecture, SDLC, Microservices, API Testing, Debugging & Root Cause Analysis

INTERNSHIP EXPERIENCE

Software Developer Intern — LM Software Solutions Pvt. Ltd.

Nov 2025 – Apr 2026

Pune, Maharashtra

- Built and maintained full-stack web applications using React.js on the frontend and Python (FastAPI) REST APIs on the backend, with MySQL as the primary data store, contributing across the complete Software Development Life Cycle (SDLC).
- Designed and consumed REST API endpoints for data exchange between frontend and backend, handling request validation, error handling, and structured JSON responses.
- Performed data cleaning, preprocessing, validation, and Exploratory Data Analysis (EDA) on structured datasets using Python, Pandas, and NumPy, and wrote optimized SQL queries (JOIN, GROUP BY, subqueries) for extraction and reporting.
- Tested and debugged REST APIs using Postman, collaborated via Git/GitHub, and supported containerized deployment of Python services using Docker.

PROJECTS

Qualiket Research — Strategic Report Automation Platform

Mar 2026 – Apr 2026

React.js, Python, python-pptx, FastAPI-style REST APIs, JWT Authentication, RBAC, Git

- Built a full-stack report automation platform with React.js on the frontend and Python on the backend to generate strategic PowerPoint presentations dynamically from Excel datasets.
- Designed secure REST APIs with JWT authentication, protected routing, and role-based access control (RBAC) for multi-user access, with structured JSON-based data processing between frontend and backend.
- Engineered a dynamic PowerPoint generation pipeline in Python with adaptive font scaling and automated layout optimization for consistent slide rendering.

Success Science Academy — Full Stack LMS

Dec 2025 – Feb 2026

React.js, FastAPI, PostgreSQL, REST APIs, RBAC, Docker, Git

- Built a scalable full-stack LMS with a React.js frontend and a Python FastAPI backend, following SDLC practices end to end.
- Designed and integrated REST APIs using client-server architecture with asynchronous request handling, and wrote SQL queries against PostgreSQL for data extraction, validation, and filtering.
- Built responsive dashboards, performed API testing and debugging, and containerized services with Docker to improve reliability.

EDUCATION

Master of Computer Application — D.Y. Patil Institute of MCA, Akurdi, Pune (CGPA: 8.56)

Jul 2024 – May 2026

Bachelor of Computer Application — Dhanaji Nana Mahavidyalaya, Faizpur (CGPA: 9.33)

Jun 2021 – May 2024

HSC — Sane Guruji Secondary & Higher Secondary School, Yawal (70%)

Jun 2020 – May 2021
